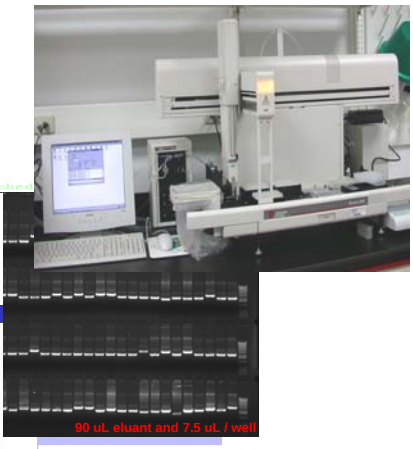
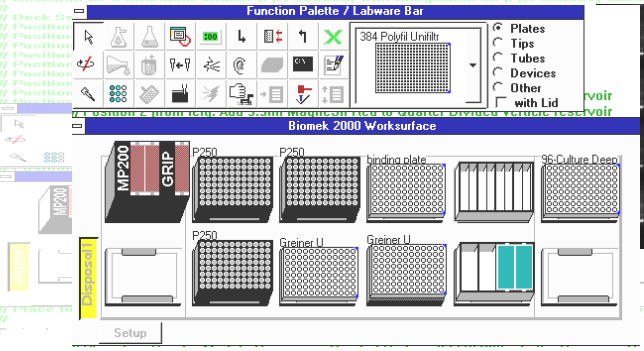
Biomek 2000 Liquid handing can provide services for

1. Purification of plasmid DNA in a 96 well format.

Consummables：

- **Wizard^{R} MagneSil^{TM} Plasmid Purification kit – Promega**
- **Beckman P250 pipette tips**

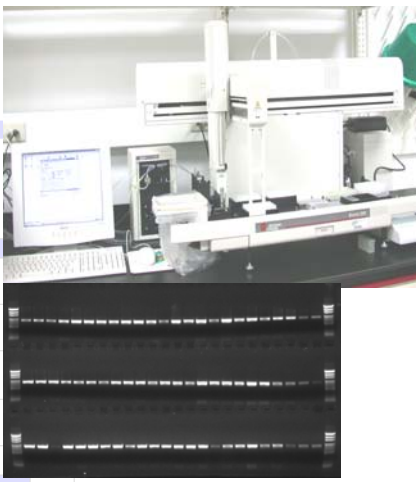




2. Purification of PCR products in a 96 well format.

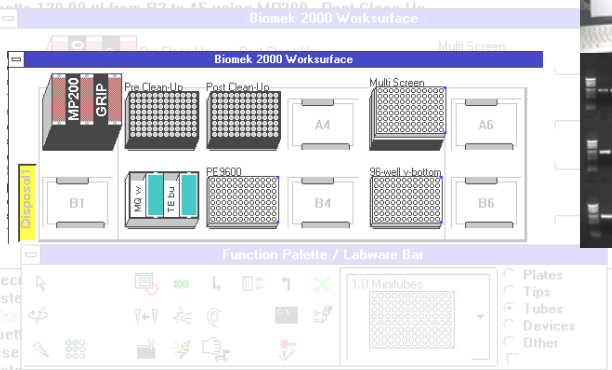
Test result：

The PCR products (800-900 bp DNA fragment) used the Montage PCR kit (Multiscreen plate) purification that overall recovery about 90%.



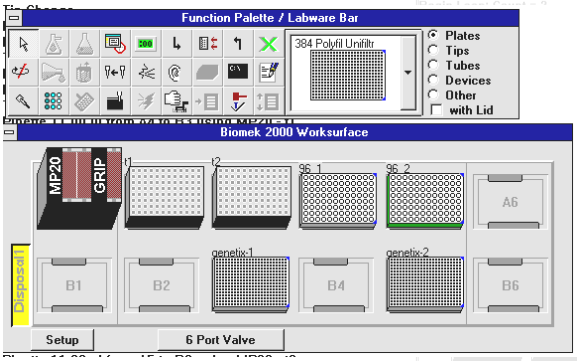
Consummables：

- **Multiscreen plate**
- **Beckman P250 pipette tips**



3. Re-dissolved oligonucleotide or Re-rack

Transfer liquid from 96 well plate to 384 well plate or from 384 well plate to 96 well plate



For more information on the services please contact the Microarray Core Lab.
